TIP OF THE DAY

GLOWSTICKS

Whether you call them Halloween light sticks or glow sticks, those little magic wands that produce an eerie glowing light, all without batteries or other electrical source are very cool. They come in a variety of sizes and colors and can be used for a number of Halloween related purposes.

Temps do have an effect on them. In general, when a light stick is cold it will glow less, but for a longer period of time. When hot, it will glow brighter, but for a shorter amount of time.

Use them to light a pumpkin, light your way on trick or treat night or to light up a Halloween prop.
